Journal of Wind Engineering and Industrial Aerodynamics, 35 (1990) vii

Contents

Preface ix
Approaches to turbulent flow computation: applications to flow over obstacles
J.H. Ferziger (Stanford, CA, U.S.A.) 1
Modelling engineering flows with Reynolds stress turbulence closure
M.A. Leschziner (Manchester, U.K.) 21
A review of velocity and pressure fluctuations in turbulent flows around bluff bodies
J.C.R. Hunt R.J. Perkins (Cambridge, U.K.), H. Kawai (Saitama, Japan), S.R. Ramsey (London, Ont., Canada) and G. Pedrizetti (Florence, Italy) 49
Examining the k–ϵ model by means of a wind tunnel test and large-eddy simulation of the turbulence structure around a cube
S. Murakami, A. Mochida and Y. Hayashi (Tokyo, Japan) 87
Analysing turbulent backward-facing step flow with the lowpass-filtered Navier–Stokes equations
R. Friedrich and M. Arnal (Munich, F.R.G.) 101
Numerical simulation of turbulent flow over surface-mounted obstacles with sharp edges and corners
F. Baetke, H. Werner (Munich, F.R.G.) and H. Wengle (Neubiberg, F.R.G.) 129
Simulation of flow past a cube in a turbulent boundary layer
D.A. Paterson (Highett, Vic., Australia) and C.J. Apelt (St. Lucia, Qld., Australia) 149
Boundary treatment for the computation of three-dimensional wind flow conditions around a building
T. Stathopoulos and A. Baskaran (Montreal, Que., Canada) 177
A two-equation turbulence model for canopy flows
U. Svensson and K. Häggkvist (Norrköping, Sweden) 201
The numerical prediction of airflow through and around permeable windbreaks and buildings
C.P. Crosby, E.H. Mathews and J.P. du Plessis (Pretoria, South Africa) 213
Application of body-fitted coordinates and the k–ε turbulence model for wind field computation in a complex urban terrain
S.C. Kot (Hong Kong, Hong Kong) 225
Numerical calculation of laminar vortex-shedding flow past cylinders
R. Franke, W. Rodi and B. Schönung (Karlsruhe, F.R.G.) 237
A discrete vortex analysis of flow around a vibrating cylinder with a splitter plate
H. Kawai (Saitama, Japan) 259
On the reliability of two-dimensional simulation for unsteady flows around a cylinder-type structure
T. Tamura (Tokyo, Japan), I. Ohta and K. Kuwahara (Kanagawa,Japan) 275
Kit Scruton: An Appreciation 299
Announcements 315
